DETAILED ACTION

Response to Amendment

1. This Office action is in response to amendment filed December 30, 2002 which is in response to the Decision by the Board of Patent Appeals and Interferences.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Drawings

3. The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on October 23, 2000 have been approved. A proper drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The correction to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 5, 7 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Perlmutter (5,145,094).

Perlumutter discloses a closure comprising: a cap member 10; a valve body 26; an ear 41; a longitudinal slot (between members 19). The elasticity/flexibility of the body and cap member will allow the functional recitation of "said ear will act against said guid member to deform said valve body and become disengaged from the slot thereby to allow removal of said valve body from said sleeve upon longitudinal movement of said valve body relative to said sleeve."

Response to Arguments

6. Applicant's arguments filed December 30, 2002 have been fully considered but they are not persuasive. In response to applicant's comment that claim 1 has been amended to include recitation that the valve body is constructed of a stiff yet resiliently bendable material and the ear both defines a stop member and is configured to cause deformation of the valve body upon rotation of the valve body to permit disengagement from the sleeve, the elasticity/flexibility of the body and cap member will allow/permit such functional recitation.

Allowable Subject Matter

7. Claims 34 and 35 are allowed.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
